

Gloform[®]

Peptide-Powered,
Bioengineered Vesicle Technology

An Innovation by **Global Experts**

Gloform[®]

The Future Of Regenerative Dermatology

At Global Experts Foundation, we are pioneers in regenerative anti-aging medicine, blending cutting-edge science with a deep understanding of human biology. Our mission is to redefine the possibilities of skin rejuvenation and healing by delivering technologies that set new benchmarks in precision, safety, and efficacy.

Our scientific approach transcends conventional methods, focusing on integrated innovations that work in harmony with the skin's natural processes. By addressing the deepest layers of skin physiology and utilizing the latest advancements in bio-engineering, we offer solutions that not only reverse visible signs of aging but also restore and protect the skin's fundamental integrity.

Gloform[®] Unique Technologies

PDN[™]: Peptides DNA Nano-Vesicle Complex

Beyond Traditional Boosters and Exosomes - A peptide-rich growth-factor & DNA complex, delivered by bio-engineered non-viable vesicles.

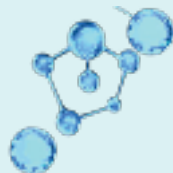

- Non-viable vesicle precision delivery for targeted cellular stimulation.
- Rich with specific targeted action Peptides and Growth Factors.
- Nano DNA (PDRN) achieve deep repair on Intracellular & Extra-cellular levels.

Hydro-Lattice Encapsulation[™]:

A sophisticated delivery system ensures sustained hydration and active release for long-lasting skin repair.

- Painless Injection.
- Minimized irritation.
- Stabilized active ingredients.

Self-Crosslinked HA:

A breakthrough in bio-compatible stabilization, providing enhanced structural integrity and unparalleled hydration.

- Sustained release.
- Prolonged hydration.
- Instant rejuvenation.

CAAC[™] Technology:

Revolutionizing collagen bio-stimulation with a tailored matrix of amino acids that is mirroring skin collagen.

- Building blocks of collagen ready for skin structural repair.
- Triggered Stimulation, rather than inflammation.

Why Gloform® is Different ?

Gloform® Peptide Growth Factors Therapy

Revolution Synergy for Skin & Hair Regeneration

GLOFORM® is not just another brand;

GLOFORM® is a groundbreaking aesthetic innovation that unites Vesicle technology with high-performance Peptides to redefine skin regeneration, pigmentation correction, and scalp revitalization.

This dual-action approach enhances cellular repair, collagen biosynthesis, and tissue restructuring, providing unmatched patient experience beyond traditional aesthetic boosters treatments.

Gloform® Line

Gloform® Generate Regeneration Peptides

The most advanced dermal regeneration injectable for:

- ✓ **Fine lines & wrinkles** – Stimulates fibroblast activity to enhance collagen & elastin production.
- ✓ **Skin laxity & loss of firmness** – Strengthens the extracellular matrix for improved elasticity.
- ✓ **Post-procedure skin recovery** – Accelerates healing after laser, micro-needling, or chemical peels.
- ✓ **Atrophic scars & tissue remodeling** – Promotes regeneration of dermal layers for smoother skin.
- ✓ **Dehydrated & dull skin** – Deep hydration and structural support with self cross-linked HA.

Gloform® Grow Hair Growth Peptides

An intensive hair follicle and scalp revitalization formula for:

- ✓ **Hair loss (androgenic & reactive alopecia)** – Reactivates dormant follicles and prevents miniaturization.
- ✓ **Weak, thinning hair** – Strengthens hair structure, increasing thickness and density.
- ✓ **Post-hair transplant therapy** – Enhances follicular survival and promotes regrowth.

Gloform® Unify Whitening Peptides

A next-generation brightening and correction treatment for:

- ✓ **Melasma Hyper-pigmentation** – Inhibits melanin overproduction and reduces existing pigmentation.
- ✓ **Post-inflammatory hyper-pigmentation (PIH)** – Accelerates skin renewal for a more even complexion.
- ✓ **Uneven skin tone & dullness** – Enhances skin clarity, brightness, and uniformity.
- ✓ **Aging spots & sun damage** – Neutralizes oxidative stress and prevents further pigmentation.
- ✓ **Sensitive & reactive skin** – Reduces redness and inflammation while strengthening the skin barrier.

Gloform® Generate

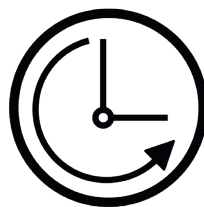

PEPTIDE-POWERED SKIN REGENERATION

Gloform® Generate is a next-generation skin regeneration injectable powered by a multi-peptide and growth-factor complex, delivered through bio-engineered non-viable vesicles, with structural HA support.

By activating fibroblasts and optimizing collagen synthesis, it enhances skin elasticity and firmness, ensuring faster healing, long-term rejuvenation, and visibly healthier skin. A powerful solution for doctors looking to offer scientifically advanced, result-driven treatments for their patients."

PDN™

- Peptides
- PDRN (S.DNA)
- Nano Vesicles

Hydro-Lattice Encapsulation™
Self-Crosslinked HA

CAAC™
Collagen Amino Acid Complex

Hydroxyproline
Reinforces skin structure,
improves elasticity

Arginine
Nitric oxide booster, Improves
skin oxygenation and nutrient
delivery

Centella Leaf Vesicles
Regenerative phytocomplex,
Enhances microcirculation,
Soothes irritation

Sh-Polypeptide-1, Sh-Polypeptide-11
Epidermal growth factors, Induces
fibroblast proliferation, triggers cellular
regeneration

DMAE

Neuro-muscular firming agent,
Lifts, tightens, and restores skin
tone

Succinic Acid

Mitochondrial energy booster,
Enhances cell metabolism,
Neutralizes oxidative stress

Niacinamide

Skin barrier enhancer, Reduces
inflammation, prevents moisture
loss

GHK-Cu: Copper Tripeptide-1

Cellular repair & anti-inflammatory
Accelerates wound healing,
boosts collagen synthesis

Gloform® Grow

PEPTIDE-POWERED HAIR GROWTH

Gloform® Grow is a cutting-edge hair restoration solution that harnesses **PDN™** Peptide Nano Therapy and bio-active scalp revitalizers. It reactivates dormant follicles, strengthens the hair fiber, and optimizes scalp health, making it an ideal choice for doctors treating hair loss, thinning, and scalp imbalances.

This **PDN™** Peptide Nano Therapy with hair-strengthening boosters, enhances scalp micro-circulation, and fortifies the hair fiber, resulting in thicker, healthier, and more resilient hair.

PDN™

- Peptides
- PDRN (S. DNA)
- Nano Vesicles

Hydro-Lattice Encapsulation™

Self-Crosslinked HA

CAAC™

Collagen Amino Acid Complex

Hydroxyproline

Reinforces skin structure,
improves elasticity

Arginine

Nitric oxide booster, Improves
skin oxygenation and nutrient
delivery

Centella Leaf Vesicles

Regenerative phytocomplex,
Enhances microcirculation,
Soothes irritation

Sh-Polypeptide-1, Sh-Polypeptide-11

Epidermal growth factors, Induces
fibroblast proliferation, triggers cellular
regeneration

Biotin

Keratin synthesis co-factor.
Enhances hair thickness and
growth

Panthenol

Keratin hydration booster.
Strengthens hair strands,
improves elasticity

Niacinamide

Scalp micro-circulation enhancer.
Prevents follicular miniaturization,
reduces hair loss

GHK-Cu: Copper Tripeptide-1

Hair regeneration peptide. DHT
Blocker, Increases hair density and
follicle lifespan

Ferrous Gluconate

Iron delivery system, Supports
oxygenation and follicle
nourishment

Sh-Polypeptide-9

Hair follicle stimulator, Reactivates
dormant follicles, boosts hair
volume

Gloform® Grow

PEPTIDE-POWERED HAIR GROWTH

Gloform® Grow is a cutting-edge hair restoration solution that harnesses **PDN™** Peptide Nano Therapy and bio-active scalp revitalizers. It reactivates dormant follicles, strengthens the hair fiber, and optimizes scalp health, making it an ideal choice for doctors treating hair loss, thinning, and scalp imbalances.

This **PDN™** Peptide Nano Therapy with hair-strengthening boosters, enhances scalp micro-circulation, and fortifies the hair fiber, resulting in thicker, healthier, and more resilient hair.

Hair follicle stimulator, Reactivates
dormant follicles, boosts hair
volume

Gloform® Generate – Skin Regeneration, Anti-Aging & Acne Scars Recommended Protocol:

- ✓ Initial Stimulation Phase: 2 sessions, spaced 2 weeks apart
- ✓ Collagen Maturation Phase: 2 session, spaced 1 month apart
- ✓ Maintenance Phase: 1-2 sessions per year

Best Combined With: ➡ Microneedling, Lasers, PRP & Retinols Home Care.

Gloform® Unify – Pigmentation Correction & Brightening Recommended Protocol:

- ✓ Initial Whitening Phase: 2 sessions, spaced 2 weeks apart
- ✓ Tone Correction Phase: 2 session, spaced 1 month apart
- ✓ Maintenance Phase: 1-2 sessions per year

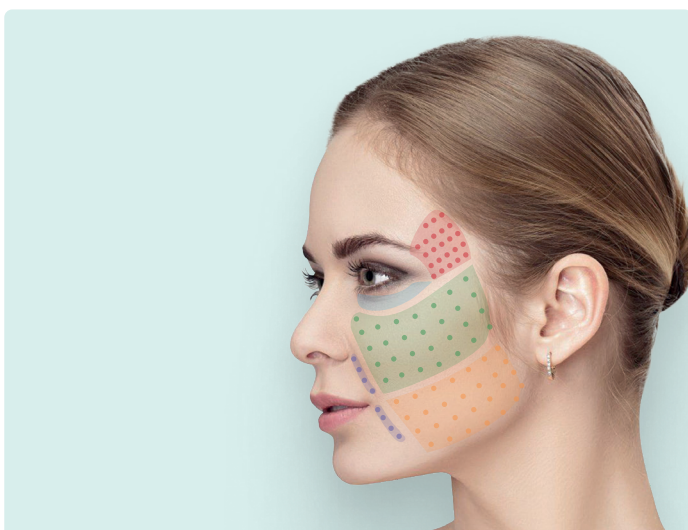

Best Combined With: ➡ Peeling, Laser toning, Microneedling, Whitening Home Care.

Gloform® Grow – Hair Loss Recommended Protocol:

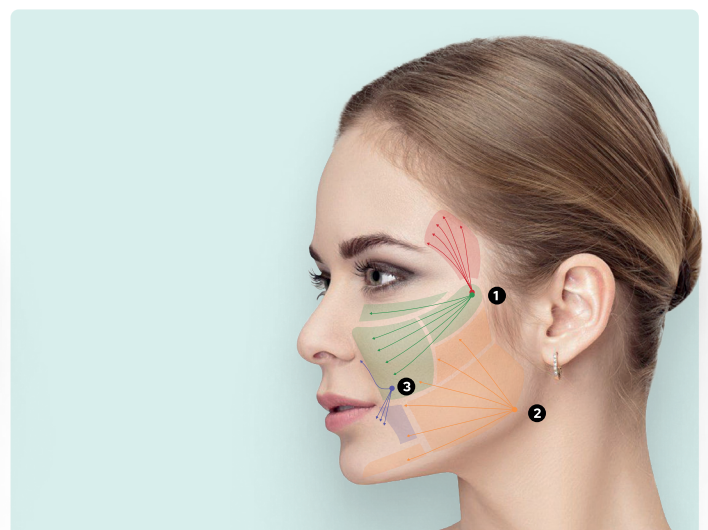

- ✓ Initial Restoration Phase: 2 sessions, spaced 2 weeks apart
- ✓ Hair Stabilization Phase: 4 session, spaced 3-4 month apart
- ✓ Maintenance Phase: 1-2 sessions per year

Best Combined With: ➡ PRP, Hair Supplement, Minoxidil for A.A. & Home Care as per reason.

Dual Grid Mapping Method

Micro Blips – Epidermal Layer

Fanning – Subdermal Layer

Science Meets Responsibility

- We prioritize biodegradable materials, sustainable sourcing, and ethical production methods, ensuring minimal environmental impact.
- Our cruelty-free and responsibly sourced ingredients reflect our dedication to ethical beauty and patient well-being.

Transform
Your Skin with

Gloform®

Gloform® is a groundbreaking aesthetic innovation that unites Vesicle technology with high-performance Peptides to redefine skin regeneration, pigmentation correction, and scalp revitalization.
